Projects

BMT Defence Services has supported many major UK and international naval and land platform programmes, and is one of the few external organisations to be named by the UK Ministry of Defence (MoD) as a Delegated Naval Authority.

Whether it is design change management and engineering support for existing platforms, whole warship design of new platforms, or providing impartial acquisition advice, we judge the mix of technologies and knowledge best suited to meeting each customer's exact and individual needs and budget. Our Associates have played a key role in projects such as;

- **UK Future Submarine ‘Successor’ Programme**

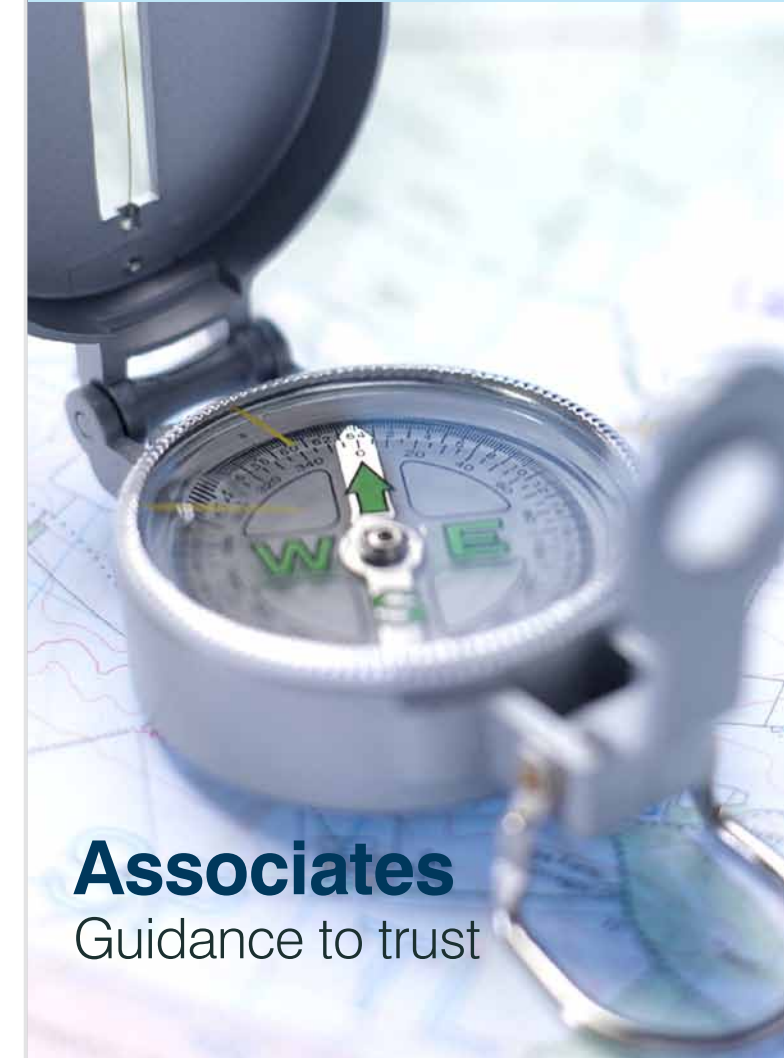

A number of our Associates were actively and personally involved in the Vanguard class submarine design and build programme, being responsible for major engineering design decisions. This previous, directly-related experience has been brought to bear in supporting design option studies and providing advice to the MoD FSM project team.

- **Design reviews of BMT’s MARS Fleet Tanker bid design**

The experience of our Associates has been applied to review the key design features for compliance with the specification and customer requirement, thus enhancing the overall design confidence in our submission.

- **EDA Personnel Recovery Equipment Study**

Our Associates provided subject matter expertise and strategic advice on personnel recovery. This was through extensive military-operational experience of search and rescue missions and combat search and rescue concepts, doctrine and architectures.

Associates
Guidance to trust

BMT Defence Services is a wholly owned subsidiary of BMT Group Ltd, offering independent engineering design, design support and technical services to meet different customer needs, both in the UK and globally, and predominantly within the defence market.

Our customers welcome our innovative, workable solutions in tackling the most complex design and systems issues. We have a strong track record in naval platform design for surface warships, submarines and auxiliary vessels, as well as extensive expertise in acquisition support within land domain projects. This could only be achieved through the high calibre of people we employ to deliver a first-class service.

What our Associates offer

Working alongside our core BMT Defence Services systems engineers, naval architects, marine engineers and software developers, we have our Associates - a network of independent, experienced individuals who work for BMT Defence Services on a project-by-project basis.

The expertise, experience and knowledge of our Associates can be brought to key projects when it is needed, enabling us to offer the very best in tailored customer service.

With over 1000 years of combined experience between them (and growing), not only do our Associates offer invaluable client understanding and insight, but also impartial expertise, gathered through years of experience in their respective areas.
